

LINDYSPRING SYSTEMS

Sanitizer Series II

**Removes Iron, Manganese and Hardness
From Household Water, While Raising Low pH Levels**

The Sanitizer Series II water treatment systems combine patented self-chlorinating technology with advanced electronics to perform like four units in one — softening, removing iron and manganese, and raising low pH levels. This self-sanitizing system also controls odors caused by nuisance bacteria and minor sulfur conditions.

System Features:

- Patented self-chlorinating technology
- Single-unit operation — no chemicals or added equipment
- Visual and audible “Check Salt” indicator
- Extended lithium battery backup
- Overrun capacity protection
- Flexible “adjustable cycle sequence” programming — saves salt and water
- Advanced history and diagnostic screens

**For all your household water conditioning
and treatment needs, count on LindySpring.**

Sanitizer Series II

Sanitizer Series II water conditioners provide the quality water you need for everyday life. Day and night, your water will now perform the way it should ... creating richer lathers using less soap, rinsing cleaner without film and residue ... even protecting your household plumbing from staining, scale and mineral deposits. Best of all, this system is built to last and easy to operate.

Count on your LindySpring dealer for expert advice on which system configuration is just right for your household and water condition. With proper water testing and system selection, you'll optimize your savings in salt and water usage while continuously enjoying the best possible water quality.

The Sanitizer Series II gives you the industry's most advanced control and operating features:

It's the Control Valve

Advanced — LCD color display actually changes colors to signal service needs or convey service modes. Easy-to-read digital lettering clearly spells out all commands and functions and will display the dealer name and phone number when system needs service. An audible chirp even alerts you to "low salt" conditions or other service needs. It will even hold history and diagnostic information. System regenerations are automatically activated according to actual water consumption and patterns.

It's the Media

At the heart of the Sanitizer Series II performance is Crystal-Right®, an exclusive crystalline media. In a single pass, this unique media does more to remove hardness, iron and manganese while raising low pH levels, than any other media available today.

It's the Chlorine Generator

LINDYSPRING's new chlorine generator is a patented device that uses the existing brine solution to generate controlled amounts of chlorine for safe sanitizing and disinfecting of the entire system. There are no special chemicals to add, no special salts to use, and no additional equipment to purchase. The sanitizing action takes place automatically every time the system regenerates.
